This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moodys.com for the most updated credit rating action information and rating history.

Global Paper and Forest Products

Outlook stable as growth from wood products and paper packaging offsets commodity paper decline

Note: A negative industry outlook indicates our view that fundamental business conditions will worsen. A positive outlook indicates that we expect fundamental business conditions to improve. A stable industry outlook indicates that conditions are not expected to change significantly. Since industry outlooks represent our forward looking view on conditions that factor into ratings, a negative (positive) outlook indicates that negative (positive) rating actions are more likely on average.

Stable global outlook

Consolidated operating income of rated paper and forest products companies will grow 2%-4% in 2018

Historic and projected rolling four-quarter operating income for a segment of the rated global paper & forest products industry

Operating income from 40 of 49 rated paper & forest products companies (US\$ billions)

Source: Company financials and Moody's estimates

Subsector outlooks are mixed

Weighted operating earnings will grow about 3%

Outlook Key:

NEGATIVE

STABLE

POSITIVE

STABLE

Paper Packaging and Tissue

Share of consolidated operating income

50%

- » Operating earnings to grow about 3%
- » Packaging growth driven by higher prices and increased e-commerce demand
- » Increased supply weakens tissue prices

NEGATIVE

Printing and Writing Paper

Share of consolidated operating income

20%

- » Operating earnings to decline about 4%
- » Secular paper consumption will decline about 5% in mature markets
- » Partially offset by higher prices

POSITIVE

Wood Products and Timberland

Share of consolidated operating income

10%

- » Operating earnings to grow about 8%
- » US housing starts will increase 6%
- » Average prices up, but volatile as the pace of new and restarted capacity differs from demand

STABLE

Market Pulp

Share of consolidated operating income

20%

- » Operating earnings to grow about 3%
- » New capacity will fuel volume growth
- » Prices for most grades will weaken in 2018 as capacity growth exceeds demand

Paper Packaging and Tissue

Outlook: Stable

Key credit themes

- » Packaging producers will benefit from the flow through of announced price increases. Economic and e-commerce growth will increase demand
- » New capacity will pressure North American tissue prices until demand catches up or as older, less efficient machines are shuttered. European tissue prices will increase slightly to offset higher input cost
- » North American and European average recycled fiber costs will be flat in 2018 as China's announced 0.5% contamination limit for recovered fiber imports will lessen imports of recycled fiber
- » Beyond 2018, paper packaging prices could be hurt if paper machine conversions to packaging grades exceed demand growth

Paper Packaging and Tissue

Outlook: Stable

- » We project modest operating earnings growth for most grades of paper packaging and tissue across North America and Europe

Subsector outlooks and projected trends by region

Region	Sector	Outlook	Demand	Supply	Pricing	Cost
North America	Paper Packaging	►	↑	↑	↑	↑
	Tissue	►	↑	↑	↓	↑
Europe	Paper Packaging	►	↑	↑	→	→
	Tissue	►	↑	↑	↑	↑

▲ Positive Outlook ► Stable Outlook ▼ Negative Outlook ↑ Increasing → Flat ↓ Decreasing

North American Paper Packaging Prices

Average virgin containerboard prices will increase slightly;
virgin paperboard prices will be flat

Source: RISI and Moody's estimates

North American Paper Packaging Prices

Average recycled boxboard prices will decline slightly; OCC costs will rebound, but average at or below 2017 levels

Source: RISI and Moody's estimates

Containerboard Capacity

Expansion will be in line with demand

- » Approximately 1.4 million tons of new North American containerboard capacity (about 3% of all North American capacity) will ramp up in 2018 and 2019, in line with annual 1.5% demand growth
- » Western European containerboard producers (especially recycled) will need to rely on a growing export market to balance the approximately 1.1 million tons of new containerboard capacity (about 5% of all Western European capacity) that will start ramping up in 2018

Announced North American and Western European containerboard expansion projects for 2018 and 2019

Company	Location	Capacity (000 Tons)	Grade	Start-up Date
International Paper	Madrid, Spain	450	recycled containerboard	2018
Leipa	Schwedt, Germany	450	recycled containerboard	2018
Pro-Gest	Grezzago, Italy	210	recycled containerboard	2018
Packaging Corporation of America	Wallula, WA, USA	400	virgin containerboard	2018
Bio-Pappel Mckinley	Port Angels, CA, USA	160	recycled containerboard	2019
International Paper	Selma, AL, USA	450	virgin containerboard	2019
Pratt	Wapakoneta, OH, USA	400	recycled containerboard	2019

Source: Company reports and Moody's estimates; only major projects listed

North American Tissue Capacity

Expansion will exceed demand

- » Approximately 700,000 tons of new tissue capacity (about 6% of North American capacity) will ramp up over the next two years, versus annual demand growth of about 2%
- » Higher-cost capacity will need to be shuttered to balance market

Announced North American tissue expansion projects for 2018 and 2019

Company	Location	Capacity (000 Tons)	Grade	Start-up Date
Sofidel America	Circleville, OH, USA	75	premium	2018
ST Tissue	Franklin, VA, USA	50	premium	2018

Paper Packaging and Tissue

Issuers of interest

» **Mondi (Baa1 stable)**

- Recent upgrade reflects structural improvement in business profile and strong credit metrics. We expect Mondi to operate with an adjusted EBITDA margin around 20% and adjusted debt/EBITDA below 2x (1.4x as of June 2017)

» **International Paper (Baa2 stable)**

- Adjusted leverage will drop to 3x by 2018 (4x as of June 2017), as the company uses its cash flow to reduce debt, following the integration of Weyerhaeuser's pulp business (December 2016) and the transfer of its underperforming consumer products business to Graphic Packaging (expected to close January 2018)

» **WestRock Company (Baa2 stable)**

- Adjusted leverage will improve to 2.6x in 2018 (3x as of September 2017), in line with the company's reported leverage target of 2.25x-2.50x. The integration of several acquisitions (most notably the \$2.3 billion acquisition of Multi Packaging Solutions Limited, which closed June 2017) will generate cost synergies and further broaden geographic and product diversification

Paper Packaging and Tissue Companies

Printing and Writing Paper

Outlook: Negative

Key credit themes

- » Demand for North American and European printing and writing grades will continue to decrease by approximately 5% per year, as individuals and businesses increasingly turn to digital alternatives
- » Capacity reduction through machine closures or conversions to other grades will likely match or exceed demand declines, leading to flat or slightly higher prices across most grades
- » Overall printing and writing paper operating earnings will decline, as weaker paper demand more than offsets modest price increases across most grades

Printing and Writing Paper

Outlook: Negative

- » We project modest operating earning declines for most grades of printing and writing paper across most regions, except Latin America

Subsector outlooks and projected trends by region

Region	Sector	Outlook	Demand	Supply	Pricing	Cost
North America	Uncoated Paper	▼	↓	↓	↑	↑
	Coated Paper	▼	↓	↓	↑	↑
	Newsprint	▼	↓	↓	↑	↑
Europe	Uncoated Paper	▼	↓	↓	↓	↑
	Coated Paper	▼	↓	↓	↓	↑

Latin America	Printing and Writing Paper	►	↓	→	→	→
▲ Positive Outlook ► Stable Outlook ▼ Negative Outlook ↑ Increasing → Flat ↓ Decreasing						

Printing and Writing Paper Production

Secular volume declines in mature markets continue

Source: AFPA and Moody's estimates

Printing and Writing Paper Prices

North American paper prices will improve, but remain near or below long-term averages

Source: RISI and Moody's estimates

Printing and Writing Paper

Issuers of interest

» UPM-Kymmene (Baa2 stable)

- Recent upgrade reflects UPM's track record of solid operating performance, deleveraging (1.6x as of September 2017), and expectation of continued financial discipline. We expect UPM to generate strong free cash flow and operate with an adjusted EBITDA margin of 17%.

» Domtar Corporation (Baa3 stable)

- Leverage will remain below 3x as the company continues to move away from commodity paper towards pulp, personal care and other fiber-based businesses. Absent acquisitions, we expect Domtar's leverage to remain flat (2.4x as of September 2017) in 2018 as EBITDA declines in step with debt reduction

» Resolute Forest Products (B1 stable)

- Recent downgrade reflects our view that leverage will remain elevated at around 5.5x in 2018 (from 6.4x in September 2017) with the continued secular decline in paper and slower than anticipated growth in new tissue business. A large unfunded pension plan (\$1.1 billion) represents about 4 turns of leverage

Printing and Writing Paper Companies

* LTM September 2017

**Projected 2017 Credit Metrics

Wood Products and Timberland

Outlook: Positive

Key credit themes

- » End-market demand for timber, lumber, oriented strand board (OSB) and engineered wood products will improve as US housing starts increase about 6% to about 1.28 million units in 2018
- » Average lumber prices expected to remain strong as higher demand in line with increased production capacity
- » Average OSB prices will be lower in 2018, as the ramp up of new capacity will exceed demand growth
- » US South timber (log) prices will remain flat as excess standing timber from years of harvest deferral easily accommodates higher demand
- » Tight lumber markets will allow countervailing and anti-dumping duties on Canadian lumber to be passed on to consumers

Wood Products and Timberland

Outlook: Positive

- » We project overall operating earnings growth of about 8% as North American lumber earnings offset declines in OSB

Subsector outlooks and projected trends by region

Region	Sector	Outlook	Demand	Supply	Pricing	Cost
North America	Lumber	▲	↑	↑	→	↑
	OSB	▼	↑	↑	↓	↑
	Timberlands	▶	↑	→	→	→
Europe	Lumber	▶	→	→	→	→
▲ Positive Outlook ▶ Stable Outlook ▼ Negative Outlook ↑ Increasing → Flat ↓ Decreasing						

Lumber and OSB Capacity

OSB capacity growth will exceed demand

- » Approximately 2.7 million square feet of new OSB capacity (about 11% of North American operating capacity) will ramp up in 2018, exceeding annual demand growth of about 4%
- » Lumber capacity growth will be in line with growing demand

Announced North American OSB expansion projects for 2018

Company	Location	Capacity (000 msf)	Type	Start-up Date
Roy-O-Martin	Corrigan, TX, USA	800	greenfield	late 2017
Tolko	High Prairie, AB, Canada	640	re-start	2018
Forex	Amos, QC, Canada	350	greenfield	2018
Norbord	Huguley, AL, USA	500	re-start	2018
Huber	Spring City, TN, USA	450	re-start	2018

Source: Company reports and Moody's estimates; only major projects listed

Lumber and OSB Prices

North America lumber prices strong as OSB prices decline

Source: Random Lengths and Moody's estimates

Canadian-US Softwood Lumber Dispute

» Clear Winners

- **Potlatch Corporation (Ba1 review for upgrade) and Georgia-Pacific (A3 stable).** Will benefit the most from higher lumber prices and no tariff (100% of lumber production is in the US). Potlatch will also benefit from increased demand for saw logs in the US South, where 60% of Potlatch's timberland is located
- **Weyerhaeuser Company (Baa2 stable).** Most of its lumber production is based in the US (16 of 19 mills) and 56% of timberland is located in the US South
- **Rayonier Inc (Baa3 stable).** 70% of timberlands located in the US South

» Canadian lumber producers also benefit

- **West Fraser (Baa3 stable).** 23.8% final combined duty on lumber sold to the US from Canada (about a third of its lumber capacity) more than offset by higher lumber prices. YTD Western spruce, pine and fir (SPF) prices up 30% from same period last year
- **Resolute Forest Products (B1 stable) and Rayonier A.M. Products (Ba3 stable).** Strong lumber prices will likely offset Resolute's 17.9% and RYAM's 20.8% final duty on lumber sold to the US (about half their lumber capacity). YTD Eastern SPF prices up 25% since last year

Wood Products and Timberland

Issuers of interest

» **Potlatch Corporation (Ba1 review for upgrade)**

- Agreement to merge with Deltic Timber Corporation (unrated), a southern timberland and wood products company, in all-stock deal valued at approximately \$1 billion, is credit positive. Benefits include increased scale, diversification, strong timber asset coverage (projected to be maintained over 2x) and pro forma leverage of around 4x

» **West Fraser Timber Company (Baa3 stable)**

- Acquisition of Gilman Companies' six sawmills and a finger-joint mill in the US South broadens West Fraser's industry leading geographic and operational diversification. The acquisition also lessens the potential negative effect of new US-Canada softwood lumber agreement and Western Canada's pine beetle infestation, while only modestly increasing leverage (0.8x as of September 2017)

» **Norbord Inc (Ba1 stable)**

- Leading OSB market position with low leverage (1x as of June 2017) and increasing stability from expansion of operations in Europe. Constraints include volatility of the North American OSB market and lack of product diversification

Wood Products and Timberland

Market Pulp

Outlook: Stable

Key credit themes

- » Recent price increases across most grades from the combination of unexpected supply outages and stronger Chinese demand will likely reverse in 2018, as capacity increases outpace demand growth
- » Latin American hardwood pulp producers will continue to enjoy structural cost advantages over North American and Western European producers due to their large efficient mills and short tree-harvesting cycles
- » Demand will increase as Chinese environmental regulations will continue to force small and medium-sized Chinese pulp mills to stop production. China's restriction on recycled fiber imports has caused some paper producers to use more virgin fiber (hardwood pulp instead of recycled fiber) in their paper production

Market Pulp

Outlook: Stable

- » We project modest operating earnings growth as increased production offsets pricing declines across most grades in most regions

Subsector outlooks and projected trends by region

Region	Sector	Outlook	Demand	Supply	Pricing	Cost
North America	Market Pulp	►	↑	↑	↓	→
Europe	Market Pulp	►	↑	↑	↓	→
Latin America	Market Pulp	►	↑	↑	↓	↓
▲ Positive Outlook ► Stable Outlook ▼ Negative Outlook ↑ Increasing → Flat ↓ Decreasing						

Market Pulp Capacity

Expansion will exceed demand

- » Approximately 5 million tonnes of hardwood pulp (~15% of global capacity) and 1.8 million tonnes of softwood pulp (~7% of global capacity) will ramp up in 2017 and 2018, versus annual demand growth of about 2%-4%
- » Significant existing capacity will need to be idled for market to absorb the expansion

Announced Market Pulp Expansion Projects for 2017 and 2018

Company	Location	Capacity (000 Tonnes)	Grade	Start-up Date
Asia Pulp & Paper (Oki Pulp & Paper)	South Sumatra, Indonesia	2,800	hardwood	2017
Fibria (Tres Lagoas II)	Tres Lagoas, Brazil	1,950	hardwood	2017
Metsä	Äänekoski, Finland	800	mainly softwood	2017
Svetlogorsk	Svetlahorsk, Belarus	400	softwood/dissolving pulp	2018
SCA (Ostrand)	Timrå, Sweden	475	softwood	2018
Sun Paper	Savannakhet, Laos	250	hardwood/dissolving pulp	2018
Chenming (Huanggang)	Hubei, China	300	softwood/dissolving pulp	2018

Source: Company reports and Moody's estimates; only major projects listed

Market Pulp Prices

Pulp prices will likely decline toward 5-year averages as new capacity ramps up

Source: RISI and Moody's estimates

Market Pulp

Issuers of Interest

» **Inversiones CMPC S.A. (Baa3 stable)**

- Extended downtime at a primary pulp mill has delayed deleveraging to 2018. The downtime reduced the company's hardwood pulp production by about 520,000 tons (or 14% of total market pulp capacity) and increased cost by about \$200 million in 2017

» **Fibria Celulose S.A. (Ba1 negative)**

- We expect gross leverage (4.6x September 2017) to decline towards its target of 2x-2.5x (net debt/EBITDA) following recent ramp-up of 1.95 million tonne hardwood pulp expansion at Três Lagoas. Fibria is rated one notch above Brazil's sovereign, given the company's good financial profile and revenue diversification outside of Brazil

» **Rayonier A.M. Products Inc. (Ba3 stable)**

- Ratings confirmed following Tembec acquisition (November 2017), with leverage remaining around 4x over the next two years. Addition of Tembec's specialty cellulose, lumber, high-yield pulp, packaging and newsprint businesses enhances operational flexibility and diversification

Market Pulp

Credit conditions will improve as global economy strengthens

Global credit conditions will improve in 2018 as economic growth picks up and low interest rates keep funding costs under control. Risks to this favorable outlook include the buildup of corporate leverage globally after a decade of low interest rates, the potential for a sizeable and synchronous equity and asset markets adjustment, and continued political and geopolitical uncertainty. In addition, a number of credit challenges loom, including disruptions from new technology, population aging and climate change.

MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
